To Whom it may Concern,

I understand that the normal radio station's and their affiliate's may feel threatened by the popularity of the satellite radio, But to people like myself and family member's it is a wonderful tool in our business. We are OTR truckdriver's and find it a great help that we can get weather and travel information while we are away from home. You see it is hard at time's to get a regular channel to report the traffic and weather condition's and the XM is the best chance most of the time because we never lose signal. Well unless under a tree or bridge ha ha. I implore you not to ban XM or to even Restrict them from broadcasting the important information that we have such a hard time finding. It is not safe to be changing channels while driving to find weather and such other information. The XM has it and we need it.

Thank You for your time
Erica Shalosky
